

WEEK-2 REPORT

Project - A Django Platform for comparing scientific methods for analyzing neural time series analysis methods

Student - Diptanshu Mittal

Mentor - Ben Fulcher, Oliver Cliff

Abstract - Adding front-end for Home, explore and How it works sections in the React application.

REACT -

Added front-end for Home, explore and How it works sections in the React application.

Next week goals -

1. Set up the results section for both user-submitted features and pre-defined hctsa features in the web app and interactive table for viewing the results.
2. Add support for the corresponding APIs in the web app and backend.
3. Add database queries for the same in the Django backend.

Blockers - There are no blockers!!
